

THE COVID-19 VACCINES BY THE NUMBERS

They've finally arrived! Here's what we know so far about these game-changing immunizations.

-94°F

The temperature at which the Pfizer-BioNTech COVID-19 vaccine must be stored.

3 DAYS

The time span when you're most likely to notice mild-to-moderate side effects (if any) post-shot.

30,420

The number of people who rolled up their sleeves for the Moderna vaccine Phase 3 trial.

Between 21 and 28 days—the ideal time you'll wait before getting your second dose of the mRNA COVID-19 vaccines that are currently in use.

The percentage of hospitalizations and deaths the shots prevented in clinical trials.

DEC 29

The deadliest day of the pandemic in Arkansas so far.

3

The number of COVID-19 vaccines currently authorized for use in the U.S., made by Moderna, Pfizer-BioNTech, and J&J.

105

The age of the oldest person in Arkansas to get a COVID-19 vaccine.

2 WEEKS

The time it takes for your body to build up the maximum protection after you're fully vaccinated.
